6 Glossary

Unit Trust: A collective investment scheme in which investors' contributions are pooled together to purchase a portfolio of financial securities, such as equities (shares), bonds, cash, bank deposits etc. The portfolio is managed by professional fund managers.

Unit: Your contributions to a unit trust are used to purchase units. Each unit represents an equal fraction of the total value of the pool of invested money. The number of units you are allocated is calculated by dividing the amount you invest by the offer price at the time.

Points to consider:

- Your risk profile;
- Your time horizon for the investment; and
- Whether you require regular income from the investment or purely looking for capital growth.

Expected Returns:(Returns depend on)

- Returns from the financial markets; and
- The type of assets within the unit trust portfolio.

Benefits: Potentially superior returns, easy and affordable investment, diversification of risks, expertise in professional management, value for money, flexible investment options, liquidity, safe and transparent, amongst others.
